Full-stack developer who loves building projects from start to finish. Website creation was a fun hobby in the past, but now it's time to shift that creative outlet into a career. Previously worked as a Production Manager for a large music venue and oversaw a 20 plus staff. In that role, problem solving, and organizational skills were key. Both of which have translated well into programming. After graduating from U.T. Austin's Coding Program the goal is to continue learning as a Full-Stack Developer and build on the foundation I've established.

TECHNICAL SKILLS

JavaScript ES6+, JQuery, CSS3, Bootstrap, HTML5, SQL, MySQL, Sequelize, NoSQL, MongoDB, Mongoose, IndexedDB, Node, NPM, Express, Handlebars, Webpack, Github

PROJECTS

petSpace

<https://www.github.com/BDunham484/petSpace>

<https://boiling-plateau-13571.herokuapp.com/>

<https://github.com/BDunham484/weather-request-permitting>

<https://bdunham484.github.io/weather-request-permitting>

- Summary: A server-side API based weather dashboard that runs in the browser
- Role: Sole Author
- Tools: HTML, CSS, Bootstrap, JQuery, Moment(), OpenWeather API

EXPERIENCE

Uber Driver

January 2019 – January 2022

Uber

- Leveraged my position as a gig-worker to have more time to pursue Web Development
- Developed Front-End Skills in HTML, CSS, Javascript, Photoshop
- Pursued personal coding projects, including developing watch faces for FitBit.

Production & Security Manager
Stubb's Waller Creek Amphitheater, Austin, Texas

October 2008 – October 2018

- Coordinated with concert tours and private events to establish day-of logistics at one of the top 10 music venues in the country that features both a 2200 capacity amphitheater and a 350-capacity indoor stage. We've hosted such acts as Lady Gaga, Metallica, Jimmy Buffett, and Fall Out Boy to name a few.
- This included establishing a schedule that coordinated with all tours and all other events on premise for the day. Ensuring that all audio, video & lighting needs were met and within budget. Staffing in-house security, 3rd party security, Police and Ems. Made sure all catering needs were met and within budget throughout the show. Maintained stage and crowd safety with a focus on reducing liability for the venue.
- Managed a 20 plus customer service-oriented security staff.
- Utilized Excel regularly and created custom spreadsheets that became a permanent format for the company.

EDUCATION

Full-Stack Certificate (In Progress)

2022-Ongoing

- The University of Texas at Austin

Logic and Computational Thinking – Microsoft Certificate

- edX

Developing a Technical Solution (UX/UI) – Microsoft Certificate

- edX
